

## Eliminate your “buddy punching problems” today!

PrintReader is an add-on biometric device that offers the convenience of “plug and play” hardware with the sophistication of biometric labor tracking. It can be added to your current Payroll Solutions Time and Attendance system, eliminating the costly expense of buddy punching. It is a simple add on to your time clock.

### Features and Capabilities

PrintReader offers the ability to record employee punches in two ways. “Verify” and “Identify”. The default method, “Identification”, permits the system to recognize an employee and record their punch through a simple fingerprint scan. Alternatively, the “Verification” method requires the employee to swipe a card or provide a PIN in addition to the fingerprint scan. The employee’s print will then be compared with the PIN or badge card used to record the punch.

Registering employees on PrintReader can be completed within seconds. In fact, even your managers can be set up with their own terminal-specific manager profile. “Admin” features are then accessible via a simple print scan so that managers can avoid revealing their administrative password. Once employee’s prints are registered on any single terminal, the record is propagated to all other TimeClocks enabling the employee to clock in and out from any active terminal or location.

### Integration

Adding PrintReader to your existing time clock is quick and easy. Before attaching the reader to your TimeClock terminal, simply update the terminal software by “reprogramming” the clock. Then continue with the final steps of the provided instructions to complete the integration. (Note: Older versions of the TimeClock terminal may require a “firmware” chip upgrade) For more information, contact Payroll Solutions at 702-256-3748.

### Connection

PrintReader connectivity to your TimeClock takes just seconds. The reader comes pre-configured and ready to connect to your unit through two simple cables. Power is supplied directly from your TimeClock unit. No additional cabling is required for operation. This makes it an ideal device for wall-mounting.

### Pricing

PrintReader involves the purchase of a single hardware unit and an additional monthly charge that is applied to your standard time and attendance system’s monthly pricing.
